Dear [REDACTED],

Thank you for your request for environmental information. We appreciate your interest, and we want to let you know that your request has been carefully considered in accordance with the Environmental Information Regulations (EIR).

**Your request:**

I am writing to request information under the Environmental Information Regulations 2004 regarding sewage and storm overflow discharges affecting Savick Brook Lancashire Please provide

1. Locations of all storm overflows discharging into Savick Brook
2. Dates and times of each discharge in the last 24 months
3. Duration of each discharge event
4. Any recorded pollution incidents or environmental impacts linked to these discharges

If possible please provide the data in electronic format CSV Excel or PDF.

**Our response:**

As requested, we have attached, as Appendix A, a list of the overflows that discharge to Savick Brook from March 2024 to February 2026.

We publish details about our storm overflows and the work we are doing to reduce spills from these overflows on our website: [United Utilities - Better Rivers](https://www.unitedutilities.com/better-rivers). As part of this information, we publish live information about the locations and any discharges from these overflows, this can be viewed at the following link: <https://www.unitedutilities.com/better-rivers/storm-overflow-map/>.

It should be noted that we report discharges from our overflows to the Environment Agency, on a calendar year basis rather than a financial year basis. The process we and other water companies use to standardly measure, and report discharges is set out on this page of our web site: [Storm overflow performance | United Utilities](#). The data provided for 2024 and 2025 has been through the validation process described on this webpage, whereas the data for 2026 has not been through this full process, yet.

For further information, this webpage contains a drop-down box that allows you to select and download the data about the discharges from all our overflows. This data is on an annual basis up to the end of 2024 and monthly for 2025 and 2026.

There have also been five recorded pollution incidents in this area, details of these can be found in Appendix B.

We hope that this response answers your request. However, if you're not satisfied with how we've handled it, you can request an internal review. To do this, please write to us at Environmental Information Office, Haweswater House, Lingley Mere, Warrington, WA5 3LP or email us at [EIRRequests@uuplc.co.uk](mailto:EIRRequests@uuplc.co.uk), addressing your request to [REDACTED], and explaining why you're unhappy with our response. We'll be very happy to review your request and ensure we've done everything we can to assist you.

Any request for an internal review should be made within 40 working days of receipt of this response, and we will reply within 40 working days from receipt of the request for internal review.

Many thanks
